SUMMARY

Assistant Manager - Product with 3 years of experience in product discovery, PRD/BRD authoring, and requirement gathering across B2B/B2C e-commerce and HR-Tech platforms. Proven in cross-functional stakeholder management, SQL-driven analytics, and workflow automation with direct exposure to AI-assisted process design and end-to-end product delivery in Agile environments.

EXPERIENCE

Assistant Manager – Product

Feb 2025 – Present

Pluckk (Essar Group) | Mumbai

- Led product discovery and authored the BRD and PRD for an automated Indent-to-Sales Order platform - defining workflow and process maps, customer and SKU mapping, pricing and address validation logic, exception handling, and human-in-the-loop verification checkpoints.
- Collaborated with Engineering and Operations to define business rules and translate automation requirements into structured process flows, ensuring alignment between product intent and technical execution.
- Prioritised features across 5+ product modules using user research and funnel analysis; authored PRDs and 10+ SOPs in Agile/Scrum, improving system uptime by 15% and launch consistency by 45%.
- Ran SQL-driven analysis on B2B/B2C order data to surface 3 fulfilment bottlenecks, reducing order turnaround by 20% and post-launch escalations by 25%.
- Designed automated ETL pipelines for real-time KPI monitoring (GMV, SLA compliance, fulfilment rate), cutting manual reporting effort by 40% and saving 15+ hours weekly.

Tech Executive

Aug 2023 – Feb 2025

Sensys Technologies Pvt. Ltd. | Mumbai

- Audited the HRMS product end-to-end, identifying 6 friction points through user research and stakeholder interviews; improvements raised regulatory compliance adherence by 20% across 50+ enterprise clients.
- Managed stakeholder relationships for 15+ B2B clients, converting user pain points into PRD-backed product recommendations that improved platform reliability by 25%.
- Designed a feature-adoption and A/B testing framework across 4 HRMS releases - achieving 100% on-time delivery, reducing post-release defects by 35%, and growing DAU by 18% over two quarters.
- Automated payroll reporting workflows using SQL validation and Excel macros, eliminating manual errors and cutting processing time by 45% across monthly payroll cycles.
